

Learn how Planted Solar's high-density, terrain-following design kept a 100 MW Southeast utility-scale project viable despite major land loss.

Nevada's largest solar power plant is owned by Sempra Generation which is a subsidiary of Sempra Energy. It started being constructed in 2010 and is fully operational at the present time.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Abstract--The rapid deployment of large numbers of utility-scale photovoltaic (PV) plants in the United States, combined with heightened expectations of future deployment, has raised concerns about land ...

This complete guide focuses on the details of solar farming, how to use a solar farm income per acre calculator to measure your costs and potential profit margins, and whether or not ...

Competitive Power Ventures" (CPV) affiliate CPV Renewable Power announced that CPV Maple Hill Solar, a 100-MW AC solar power generation facility in Portage Township, Pennsylvania, has ...

Silicon Ranch and Meta are bringing a new 100-megawatt solar power plant to South Carolina, along with a land stewardship plan.

A workgroup was created by Harford County to assist in the implementation of solar projects on the county's agricultural land, but in 2023, the Maryland General Assembly passed ...

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

Key highlights of the project were the innovative design of Balance-of-System (BoS) and cabling, along with optimized selection of evacuation systems. This 100MW solar power plant was completed in ...
