

In a significant move that highlights the growing synergy between the technology and renewable energy sectors, the Walla Walla Solar Farm is now supplying clean power directly to ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Located in the heartland of the Andes at an altitude of over 4,000 meters, the project has an installed capacity of 315 megawatts. It was jointly signed into effect by the leaders of the two countries on May ...

#China installed a large 315 gigawatts (315,000 MW) of new solar photovoltaic (PV) capacity, shattering global records and cementing its position as the world's largest solar energy market. This ...

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the...

Steel producer ArcelorMittal and developer Atlas Renewable Energy have completed, three months ahead of schedule, the construction of a 315 MW solar power plant in Paracatu, Minas ...

Atlas Renewable Energy and steel manufacturing group ArcelorMittal SA (AMS:MT) have inaugurated the 315-MWp part B of the Luis Carlos Solar Park in Brazil three months ahead of ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.
