

About wind power and photovoltaic power generation policy

The extra layer of scrutiny for wind and solar contrasts with actions by the Trump administration to make it easier and cheaper for companies to produce oil, coal, gas and nuclear power.

Alongside wind and solar, the country will orderly advance major hydropower projects, actively and safely develop nuclear power, and improve the clean and efficient use of fossil fuels, based on the ...

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatthours (kWh) in 2023 to 286 billion kWh in 2025. We expect ...

There is a patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact your project development. It is important to understand the policy landscape ...

This report underscores the urgent need for timely integration of solar PV and wind capacity to achieve global decarbonisation goals, as these technologies are projected to contribute significantly to meet ...

Trump, who has called climate change a hoax, has promised to fast-track energy infrastructure to meet rising electricity demand from artificial intelligence and data centers, declaring an "energy...

Research, investment, and policy pivotal for future energy demands. The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on ...

As the biggest renewable energy generation country, China's wind power, and PV power generation industries have high growth and are suffering from the subsidy gap.

This statute provides the framework for the development of solar energy and wind energy projects on federal lands managed by the Bureau of Land Management (BLM).

This report underscores the urgent need for timely integration of solar PV and wind capacity to achieve global decarbonisation goals, as these ...

Few studies have optimized global deployment of photovoltaic and wind power. Here we present a strategy involving construction of 22,821 photovoltaic, onshore-wind, and offshore-wind...
