

That topic came up in the TV programme *Stand van Nederland: Wereld op Scherp*, where DENS shared real-world insights into battery storage developed and built in the Netherlands.

This two-day event in Amsterdam offers both in-person and virtual participation options, enabling EV manufacturers, energy storage experts, engineers, and technology providers to ...

At this exhibition, ACE Battery not only showcased its leading energy storage technologies but also engaged in in-depth discussions with multiple European energy companies.

Within Europe, the Netherlands is one of the leading countries when it comes to developing next generation and more sustainable battery materials and components. It already has ...

Amsterdam's engineers have developed liquid cooling systems that mimic the city's historic water channels. These 'micro-canal' battery racks maintain optimal temperatures between 15-25°C even ...

Return's high-tech battery energy storage system ('BESS') platform connects storage sites across countries, showing real-time insight where energy is available and needed to ease ...

The European Battery Value Chain will take place from 9 to 10 October 2025 in Amsterdam. The two-day event will bring together industry leaders, innovators, and policymakers to explore cutting-edge ...

Dutch manufacturer of Lithium-ion batteries for e-mobility and industrial machines. We offer standard and custom made battery solutions.

ARCNL, based at Amsterdam Science Park, has uncovered a fundamental mechanism that may significantly improve battery performance. In collaboration with Leiden University, ...

Developed by GIGA Storage with financial support from Rabobank and Triodos Bank, and construction partners K. Dekker and Van den Heuvel, Amsterdam's largest battery project ...
