

Bangkok Cable (BCC) has partnered with HiTHIUM, one of the world's top leaders in Battery Energy Storage Systems (BESS). This collaboration merges high-quality electrical cables ...

Battery energy storage systems (BESS) are technologies that store energy for later use, helping to balance supply and demand. They are crucial for integrating renewable energy sources, enhancing ...

Ahead and heading into a new era for new energy, it is expected that China's energy storage capacity and its BESS capacity in particular will grow at a CAGR rate of 44% between 2023 and 2027.

It is on the brink of a battery energy storage (BESS) leap that could reshape its energy systems. The region's market is valued at around USD 3.5 billion in 2024 and is projected to ...

Mainland China battery storage market has experienced drastic growth since 2022 and is exclusively supplied by local players, leading to Chinese system integrators moving up on the global ...

Volta's annual report now stretches to 750 pages, diving deep into many technical areas, along with the usual focus on battery energy storage systems (BESS).

China's exports of batteries and battery energy storage systems (BESS) have hit a record in 2025, soaring by 24% from the year before over the first nine months of the year.

Solar PV giant Trina Storage launched its latest BESS solution which uses in-house manufactured lithium-ion cells at the event. Trina's move is part of a wider industry trend of China's BESS ...

These rankings illustrate the dynamic and competitive landscape of China's energy storage industry, showcasing its growing influence both domestically and globally.

BESS are now central to enabling a flexible, resilient, and low-carbon power system. The Asia-Pacific is projected to lead the global BESS market by 2026, with China, Japan, India, and ...
