

Are solar panel mounts suitable for Canada's climates?

We supply mounts built specifically for Canada's climates. These solar panel mounts help the solar power system stay firmly in place and are durable.

Can I install roof-mounted solar panels in Canada?

Not all dwellings can support roof-mounted solar panels in Canada. A ground mount is great for properties with the space to accommodate them. Your roof may be obstructed by trees, which could make a ground mount more optimal. It might be easier to install ground mounts depending on the condition of your property.

Do you sell solar panel mounts in Canada?

The solar panel mounts we carry are designed for the climatic conditions in Canada, such as harsh weather, high winds, and higher latitudes. In fact, we only sell mounts from brand name suppliers with superior track records for safety and reliability. Not sure which mount you need? Give us a call and we'll walk you through your options.

What types of solar mounting systems are available?

Ballasted solar mounting system for flat roofs. Solar mounting system for sloped roofs. Heavy duty solar mounting system for ground installations. Modular solar mounting system for ground installations. Fast-Rack's suite of solar mounting solutions are designed for solar professionals who want to install solar faster.
