

Cape Verde inaugurated new wind and battery storage installations on Monday as part of the expansion of its Cabeolica renewable energy project, backed by more than 39 million euros in ...

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which comprises an ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids.

Cape Verde's Special Project Management Unit is inviting bids to design, supply and install four energy storage systems (ESS). The ESS will be located on Fogo island (2.08 MW/2.08 MWh), Santo Antao ...

This increase, according to Prime Minister Ulisses Correia e Silva, will help achieve the government's goal of more than 50% of electricity production from renewable energy by 2030 and ...

As part of its efforts to scale renewable energy, stabilise its grid and reduce carbon emissions, Cape Verde has inaugurated the expanded Cabeolica Wind Farm and a new Battery ...

Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage.

The energy transition in Cape Verde has now started. For example, the energy network will be expanded and modernized, options for energy storage will be realized and ultimately a sustainable ...

Specializing in battery energy storage systems (BESS) within shipping container frameworks, this facility represents Africa's first vertically integrated manufacturing hub for modular renewable energy solutions.

This expansion includes the installation of two 5 MW wind turbines and a 5 MW/h energy storage system, further reinforcing Cabo Verde's commitment to green energy (reaching 50% renewable ...
