

How many electric cars are there in Mexico?

Mexico has more than 53 million vehicles on the road, of which around 0.5% were hybrid or electric in 2022. Of these vehicles, only 5% are Chinese, according to the Mexican Association of the Automotive Industry (AMIA). High prices for electric vehicles are a barrier to adoption in Mexico. The average annual wage is under \$17,000.

Should Chinese EV companies invest in Mexico?

Mexico offers low labor costs and has a free-trade agreement with the U.S., making it an attractive location for Chinese EV companies. The BYD Seagull, a compact Chinese EV with a starting price of approximately \$11,400, would undercut U.S. prices significantly.

Who makes electric cars in Mexico?

Mexico also has a local EV maker, Zacua. Chinese electric automakers MG, BYD, and Chery are all looking at sites to build new factories in Mexico. The MG electric car factory deal is potentially worth \$1.5 billion to \$2 billion, and BYD is reported to be considering a Mexican factory investment worth hundreds of millions.

Is Mexico a good place for EV production?

U.S. concerns grow as Chinese firms like BYD Mexico consider Mexico for EV production, raising worries about China's dominance. Mexico offers low labor costs and has a free-trade agreement with the U.S., making it an attractive location for Chinese EV companies.
