

California now has more installed battery capacity than any other jurisdiction on the planet except for China, according to Newsom.

The sprawling field of solar panels and batteries in the Mojave Desert is now one of the country's largest and will sell power to the cities of L.A. and Glendale.

In 2019, the Los Angeles City Council approved the two power purchase agreements that paved the way for Eland 1 and Eland 2 to be developed. Since then, LADWP has worked to deliver ...

Tesla's video highlights how large-scale solar and battery storage can help transition major cities to sustainable energy while reducing reliance on fossil fuels.

Luna Storage and LAB are standalone lithium-ion battery storage projects in Lancaster, Los Angeles County, California. These projects store clean energy for use during periods of high demand or when ...

In a significant move toward enhancing energy resilience and sustainability, the Clean Power Alliance (CPA) has recently launched two major solar and battery storage projects in ...

Battery projects in the hundreds of megawatts are becoming more common. Such large systems exist or are under development in California, Florida, Australia, the United Kingdom and China.

Battery storage acts as a critical bridge between clean energy and reliability. By capturing excess solar and wind power when it's plentiful and releasing it when demand peaks, ...

Projects Bring a Combined 600 MW of Solar and 390 MW of Battery Storage to Power 270,000 Homes and Create an Estimated 950 Construction Jobs For immediate release: March 17, ...

The project provides power for 135,000 homes and has created an estimated 400 construction jobs. The electricity generated from the 300 MW solar project, combined with a 240 MW ...
