

Commercial energy storage batteries in Georgia

The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid over a four-hour period, adding resiliency to the state's power ...

Georgia Power began commercial operation of the company's first grid-connected battery energy storage system, the 65-MW Mossy Branch Battery Facility, in November 2024.

The Center of Innovation assists businesses focused on energy storage in two primary ways. We work closely with Georgia's universities to identify cutting-edge research regarding energy storage and ...

Georgia Power announced that construction is underway on 765 megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, ...

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC), Georgia legislature, and Talbot and Muscogee counties on Thursday to mark ...

Georgia Power 's first grid-connected battery energy storage system (BESS), the 65 MW Mossy Branch Battery Facility, has reached commercial operation.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, ...

As of late 2025, Georgia hosts approximately 146 MW of operational battery energy storage capacity, with another nearly 4,000 MW under construction, approved, or in development across its utility ...

Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in 2026.

In this article, we will explore the specifics of these battery storage projects, their anticipated benefits, and Georgia Power's broader commitment to sustainable energy solutions.
