

DC power station using Australian energy storage container

Strategically located in Cunderdin, Western Australia, the project features Sungrow's fully DC-coupled system architecture, which connects the PV system directly with the battery storage to ...

First project to be constructed using 5MWh energy storage containers in Australia with 25 years warranty. Partners with INTEC Energy Solutions to deliver full EPC solutions and 25 years ...

Discover the largest upcoming BESS projects in Australia, from the 2.4GW Denman Battery to the Waratah Super Battery.

Technology group Wärtsilä; has announced it will deliver the largest DC-coupled hybrid battery system in the National Electricity Market (NEM), reflecting a growing trend toward ...

This guidance report has been commissioned by the Australian Energy Council to initiate and facilitate collaboration amongst its member organisations towards a harmonised leading practice approach for ...

This project is set to become operational by 2028, with the ability to provide power to up to 120,000 homes and businesses, helping Australia to achieve its net-zero emissions target by 2045.

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially operational in the NEM, totalling just under 2 ...

The project, which pairs the 128 MWh DC-coupled battery with an 80 MW AC solar farm, marks a significant step in Australia's transition to co-located hybrid renewable energy and storage ...

Finnish marine and energy technology group Wärtsilä; will deliver what it claims is "Australia's largest DC-coupled hybrid battery energy storage system (BESS)" for the National ...

The future of large-scale energy projects in Australia is looking increasingly DC-coupled thanks to Wärtsilä;, which just announced plans to build the largest BESS of its kind in the National...
