

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate in the ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, featuring a 99MWh battery system.

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications in rural electrifications, particularly solar ...

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications in ...

The Dominican Republic's national energy commission has approved a new 83.4-MW/101.6-MWp solar project with storage, as well as inaugurated a 58.48-MW/64.70-MWp solar ...

What is the first solar-plus-storage project in the Dominican Republic? Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh ...

Amongst them are Pecasa, a 50MW wind project financed with development banks and operated in cyclonic conditions, Matrisol, a 55MW solar project with the first private offtake scheme in the ...

The national energy commission (CNE) of the Dominican Republic this week granted a definitive concession for a 83.4-MW/101.6-MWp solar project with storage, while the nation's Vice ...

In a significant move to modernize the national power grid, the Unified Council of Electricity Companies (CUED) has unveiled a public tender for up to 600 megawatts (MW) of new ...

The project will be paired with a 15MW/60MWh battery energy storage system. Image: Dominican Republic Presidency. Spanish renewables developer Ecoener has received a definitive ...

The Dominican Republic targets 300 MW of energy storage by 2027 to boost grid stability and renewables. Discover the latest Dominican Republic energy news, regulations, and investment ...
