

How much is Israel Electric Vehicle market worth?

Israel Electric Vehicle Market was valued at US\$3.0 billion in 2023 and is projected to hit the market valuation of US\$12.9 billion by 2032 at a CAGR of 52.42% during the forecast period 2024-2032. EV demand has increased by 40% and this type of car accounts for about one-fourth of all new cars sold.

How many electric vehicles are there in Israel?

The number of electric vehicles is projected to rise from the current 70,000 to approximately 1.3 million by 2030, with the long-term vision of electrifying all 6 million vehicles on Israeli roads by 2050. In spite of an expected increase in taxes on electric vehicles; however, growth projections for EVs remain strong.

Why is EV demand increasing in Israel?

EV demand has increased by 40% and this type of car accounts for about one-fourth of all new cars sold. This is mainly due to the dominance of Chinese brands in the Israeli market for electric vehicles; these include gasoline engine versions as well, and account for nearly 19% of all new vehicle sales.

Can electric vehicles be charged overnight in Israel?

Most existing charging points in Israel electric vehicle market provide slow-charging options, for instance; those with less than 100KW account for more than 45.54% of the market share. This is an indication that it is possible to charge vehicles overnight or when they are going to remain parked for a while.
