

Access country profiles and data on electricity access, renewable energy, energy efficiency, and clean cooking to inform sustainable energy investments and reforms.

Bolivia's overall energy mix is dominated by fossil fuels, with natural gas (50%) and petroleum products (31%) supplying most of the country's energy in 2020. [1]

The savings potentials are calculated based on the assumption that Minimum Energy Performance Standards are implemented in 2022 at a level derived from the United for Efficiency Model ...

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...

This web page provides an overview of the energy sector of Bolivia, including data on the energy mix, energy use and emissions; and a policy overview. Publisher/Journal: IEA

Following a successful initial phase, NIRAS IP Consult is continuing its work to increase renewable energy and enhance energy efficiency in Bolivia through organisational cooperation and consultancy ...

To better answer this question, a long-term optimization model of the Bolivian energy sector was developed with OSeMOSYS, considering the national energy demands, disaggregated by fuel and ...

Fuel Mix Greenhouse Gas Emissions Government Agencies & Other Key Players Electricity Usage Coal in Bolivia Oil & Natural Gas in Bolivia Renewable Energy in Bolivia Iron & Steel in Bolivia Environmental & Social Impacts of Energy in Bolivia The Bolivian constitution guarantees respect for Pachamama (Mother Earth). However, resource extraction in Bolivia has been very destructive to the environment, as with the opening of protected territories to oil and gas exploration and exploitation. Mining has been blamed for drought conditions because of the extensive water used by the mining ind...
