

Explore 2026 industry trends shaping the U.S. power grid--virtual power plants, energy storage growth, ERCOT battery performance, LDES adoption, and supply chain impacts on grid ...

From 10GW of battery storage expected to be deployed in the US over the next two years, more than 60% will be installed with solar PV, according to the US Energy Information ...

Andover, Mass., March 14, 2024 - Enel North America, a leading clean energy company, has surpassed 10 gigawatts (GW) of installed wind and solar capacity across the United States and Canada as well ...

On November the 6 th, National Grid Electricity Transmission announced plans to streamline 10GW of battery energy storage (BESS) capacity that is currently waiting for a grid ...

The landmark event saw battery storage overtake gas, nuclear, hydro and renewables as the biggest source of supply for a period of about two hours in the evening peak.

This Review discusses the application and development of grid-scale battery energy-storage technologies.

Volta's annual report now stretches to 750 pages, diving deep into many technical areas, along with the usual focus on battery energy storage systems (BESS).

Under the agreements, e-STORAGE will deliver its SolBank 3.0 battery energy storage system and provide 10 years of long-term services, supporting system reliability, performance ...

As UK battery energy storage capacity drives past the 1GW mark, the industry is now plotting its advance towards the next sizeable hurdle. This article discusses how the UK has already ...

In an announcement made today (6 November), the organisation stated that 19 BESS projects, worth around 10GW, will be offered dates to plug in, on average, four years earlier than ...
