

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

In this data-driven industry research on energy storage startups & scaleups, you get insights into technology solutions with the Energy Storage Innovation Map. These trends include AI ...

The MIT-GE Vernova Climate and Energy Alliance, a five-year collaboration between MIT and GE Vernova, aims to accelerate the energy transition and scale new innovations.

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

That's why leaders from across the energy industry launched the U.S. Energy Storage Coalition to make storage a core part of America's energy strategy. Energy storage is truly unique in its ability to add ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

NSW concludes Australia's largest LDES tender, awarding six battery projects 12GWh. Industry calls it "game-changer" for grid reliability. A framework for the "development, utilisation and ...

This trend report provides an in-depth analysis of the ten most critical energy storage trends, from hydrogen and battery storage systems to innovative solid-state and long-duration solutions, as well ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, according to a new ...

Developments in batteries and other energy storage technology have accelerated to a seemingly head-spinning pace recently -- even for the scientists, investors, and business leaders at ...

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and policies by governments and ...

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...

Making clean energy investments more successful Tools for forecasting and modeling technological improvements and the impacts of policy decisions can result in more effective and ...

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

The energy storage systems market size exceeded USD 668.7 billion in 2024 and is expected to grow at a CAGR of 21.7% from 2025 to 2034, driven by the rising demand for grid stabilization and energy ...
