

Skeleton Technologies has been founded in Estonia in 2009 and, according to its own account, is a leading European provider of high-performance and fast-charging energy storage systems for ...

Tallinn-based Skeleton Technologies, a company that manufactures and develops high-energy and power-density ultracapacitors, announced on Friday, October 13, that it has secured ...

Skeleton Technologies is an Estonian energy storage developer and manufacturer for AI data center, transportation, grid, and defence applications. Skeleton is developing a novel raw material, curved ...

Skeleton Technologies, an Estonian manufacturer of ultracapacitors and SuperBatteries, is set to receive EUR51 million from the German government and the state of Saxony towards its second ...

Skeleton Technologies is the world's largest manufacturer of supercapacitors for mission-critical infrastructure and industry, founded in 2009 in Estonia. Power today is more than electricity...

We have tested all the leading suppliers on the market and are convinced that Skeleton Technologies has by far the best offer. The lowest internal resistance (ESR) and highest efficiency levels of ...

Led by world-class material scientists and researchers, Skeleton Materials is already the global leader in synthesizing capacity and scaling up Curved Graphene material production to industrial levels to ...

Tartu's supercapacitor manufacturers combine Nordic engineering precision with sustainable practices. As energy storage needs evolve, their ability to deliver high-power density solutions positions Estonia ...

The Estonian company Skeleton has opened a EUR220 million supercapacitor factory in Leipzig to support artificial intelligence data centers and stabilize Europe's power grids.

Skeleton Technologies, founded in Estonia in 2009, specializes in advanced energy storage solutions using Curved Graphene. Offering supercapacitors and SuperBattery technology, they serve ...
