

Can a licensee subcontract the installation and maintenance of EV charging infrastructure?

9.1 The Licensee may subcontract the installation or maintenance of the EV charging infrastructure but shall remain responsible for ensuring all terms of this Agreement are met. 9.2 The Licensee shall not assign this Agreement without the prior written consent of the Licensor, which shall not be unreasonably withheld, conditioned, or delayed.

What is a charging station agreement?

As the world of government incentives and charging stations evolves in unpredictable ways, the charging station agreement is the optimal legal document to set forth the parties' agreement as to incentives. Some states are enacting legislation to streamline the granting of permits for EV charging stations.

Do municipalities need EV charging stations?

Municipalities likely have specific requirements for permitting, site selection, and accessibility, which can influence the feasibility and cost of deploying EV charging stations. Understanding this regulatory patchwork is essential for the successful development of EV charger projects.

How EV charging infrastructure is being developed in the United States?

Further, the United States has taken significant steps to promote the development and deployment of EV charging infrastructure. For example, the Bipartisan Infrastructure Law (BIL) signed in November 2021 allocates substantial funding for EV charging stations.
