

This spreadsheet lists all items needed to create an UV Solar Panel and an Octuple Compressed Solar. The sheet is outdated for the former, since it was made before solar factory was ...

GregTech 5 is an addon mod that completely overhauls IndustrialCraft 2 by adding numerous machines and materials, adjusting recipes for existing items, and revamping ore generation.

The GregTech 5 Solar Panel is a cover that can be attached to Wires, Machines, or Machine Blocks and produces EU from sunlight. A Solar Panel will generate EU when it can see the sun (daytime, not ...

Steam can be automatically output to adjacent machines or out any face that is not the bottom. The solar generator cannot heat up with a machine above it, but can with a pipe above it. All steam ...

Because GregTech 5 is a large-scale mod, some players may struggle. This document describes the initial tech tree and other related information to help players using GregTech for the ...

Go for the Thermal Generator (it doesn't consume the actual lava cells, and produces 10k more EU than the geothermal generator). With a pump and liquid tesseracts from a lava lake in the Nether, that's ...

There are several Generators available and several machines available. Steam Generators (SGs) need to be fed water to produce steam. Currently, it appears there is no difference in performance ...

I've re-purposed part of my solar setup to power it so that 100% of the wood produced can be used to make steam for my GT boiler. I've set it to farm vanilla oak trees as I thought I might use the apples ...

Solar Panel is an item added by the GregTech 5 mod. It can be right-clicked with on the top side of the machine. It will then fill the internal energy buffer of the machine with 1 EU/t when it is not raining and ...

There are two variants, the Simple Solar Boiler and Advanced Solar Boiler which has three times the output of the former. Both require silver to craft, which makes them difficult to source ...
