

The house is fairly well insulated with good windows. It runs fairly stable around 60 on second floor. I run first floor at around 65. this is with temps in the teens at night and twenties ...

we are looking at buying a house that has a stone fireplace in the living room and a place in the basement to connect a woodstove, the house is 1456 sq ft on one floor and the basement is ...

From there the main to the house goes underground to the main house and comes up an exterior wall and actually above the ceiling into the attic space (under insulation but still meh). ...

I will start by saying that I have never spent so much time and effort into something and still lack proper understanding of operation. My frustration with this stove has been immeasurable. I ...

Example, house was 67 when I loaded for the night last night at midnite, put in 5 splits on a good coal bed, got it going, turned the air way down and the stove was cruising at about 600. Nice, ...

The 500# tank is probably connected with a copper line with a fitting on the end to mate to the tank's nozzle. To use the 100# tank first compare the nozzle on it to the 500# tank and see if they ...

The stack was lower than my house and it would set off a smoke detector in my attic. The town elected to work with him and after he put in a 30" extension on his stack it became far less of an ...

The latest road block on my way to burning wood in the house is that my Wife is afraid that the whole house will smell like wood smoke - everything, clothes, clothes in the closet, furniture, ...

The past few days, creosote is running down the outside of the pipe that is inside the house, between the ceiling and the stove. The exterior pipe looks fine. Also, this fall we had resealed ...

If you are getting smoke in the house or you stove just don't seem to be burning like should. Check the door seal and latch for a tight fit. Check the ash pan for shut tight and latched If all ...
