Which power plant produces the cheapest electricity?

ntional power plants, lignite coal power plants produce electricity the cheapest: for 4.59 to 7.98 Ct/kWh. Hard coal power plants generally produce a bit more expensive: for 6.27 to 9.86 Ct/kWh. The production costs of coal electricity strongly depend on how much the respective plant is used. However, coal-fired power plants are quit

How is electricity generation cost measured?

n. Electricity generation costs are usually measured as LCoE which means "Levelized Cost of Electricity The LCoE is a measure of the average cost of electricity generation for a power plant over its lifetime. The idea is to compare different technologies in a uniform way. The LCoE however does not take into consideration how economi
