

How to query the distribution of local communication green base stations

Cell Analytics provides intelligence on wireless service quality, RF measurements, data usage, user density (indoor & outdoor), cell site locations, and more.

Select your country and network type to see how much data saved to our database. To install our application you can grow your provider statistics easily. CellMapper is a crowd-sourced cellular tower ...

GeoTel's comprehensive Cell Tower Locations dataset spans over approximately 526,000 cell tower sites. Our data empowers users to identify and assess readily leased wireless facilities.

OpenCelliD is the largest Open Database of Cell Towers & their locations. You can geolocate IoT & Mobile devices without GPS, explore Mobile Operator coverage and more!

CellMapper is a crowd-sourced cellular tower and coverage mapping service. By contributing data to the website, you can help map actual coverage of cellular networks based on real life conditions.

Open map of the world's electricity, telecoms, oil, and gas infrastructure, using data from OpenStreetMap.

CellMapper is a crowd-sourced cellular tower and coverage mapping service.

The application measures the signal strength and other network data collected by the end users and use the data collected to locate network base stations and their coverage.

Interactive map showing real-time cellular signal strength data contributed by community members for a clearer view of network coverage.
