

The FlexiO series is a highly integrated battery energy storage system (BESS) designed to optimize performance and reduce costs for stationary commercial and industrial energy storage applications.

The Generac PRC is a ready-to-deploy microgrid islanding solution that offers grid failure detection, sub-cycle grid isolation, and protected grid resynchronization.

We can provide turnkey services for microgrid development at any phase of your project, with experts to help you determine which services are right for your business objectives.

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

This video showcases the installation of a microgrid project that includes an ESS Energy Warehouse &#174; system at an industrial recycling facility in West Grove, Pennsylvania.

Energy management that balances energy savings, energy resilience and carbon reduction. See how Generac helps commercial and industrial customers meet their energy goals.

It features flexible parallel operation, allowing multiple units to work together. With a maximum PV input of 240kW and liquid cooling for maintaining high - power stability, it is well - suited for industrial ...

Our products serve a wide range of needs including utilities, commercial and industrial sectors, microgrids, and defense, each designed to be safe, durable, and cost-effective.

Dozens of our high-power DC-DC Cabinets are currently being configured in large scale microgrid applications in the United States. Our American partners are always pushing the innovative ...

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications.
