

# Is there anyone doing energy storage power in canberra

The Big Canberra Battery has inched a step closer to being built, with the ACT government announcing it will partner with Eku Energy to deliver the mass-energy storage device.

The Capital Battery, proposed in south east Canberra, will be a 100 MW stand-alone battery that stores energy and discharges it whenever it's needed.

Since 2020, 100% of electricity in the ACT has come from renewable sources, and initiatives like community batteries prove the viability of local renewable energy generation and ...

With ambitious climate targets - including 100% renewable electricity by 2025 - the Australian Capital Territory (ACT) relies on cutting-edge storage systems to stabilize its grid. Let's explore how these ...

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched ...

In partnership with Eku Energy, construction is underway on concrete bases for the batteries and the main switching building at Williamsdale. The large-scale battery energy storage ...

The six community-scale batteries are part of a temporary three-month trial to support the electricity network during Canberra's high-demand winter period. They store energy from the grid ...

The ACT Battery project in Australia will enhance the quality of supply in the city of Canberra and accelerate the country's energy transition by enabling greater introduction of ...

Energy Storage is critical for ACT's 100% renewables and net-zero target. Helps to put downward pressure on electricity price paid by ACT consumers. Reduces the need for electricity network ...

The project will support 150 local jobs in the emerging clean energy sector. Battery storage technology is a key component of the ACT's net-zero emissions future.
