

Eco Wave Power is a leading onshore wave energy company revolutionizing clean energy with its patented, smart, and cost-efficient technology that converts ocean and sea waves into ...

Eco Wave Power's achievement at Jaffa Port highlights the Company's ongoing commitment to demonstrating the scalability and reliability of wave energy. The project has now successfully ...

The Tafilah Wind Farm is the first commercial utility-scale wind power project in the Middle East, and largest privately-financed wind farm in the Hashemite Kingdom of Jordan.

This connection was agreed and announced in April 2023 through an official Power Purchase Agreement with the IEA. This agreement led to the connection to the Israeli electrical grid in August 2023, ...

The Tafila Wind Farm is the first commercial utility-scale wind power project in the Middle East, and largest privately-financed wind farm in the Hashemite Kingdom of Jordan.

Operational since 2020, it contributes significantly to Morocco's renewable energy targets and efforts to mitigate climate change. The wind farm was developed by ACWA Power in collaboration with ARIF ...

Large-scale integration of wind turbines (WTs) results in the reduction of the power system inertia and weakens the system's frequency regulation capability.

To deal with this problem, this paper proposes a coordinated control scheme for PMSG-based WTs, which applies a virtual synchronous control in the grid-side converter to realize grid...

As the capacity of wind power generation increases, grid-forming (GFM) wind turbine generators are deemed as promising solutions to support the system frequency for future low inertia ...
