

NAIROBI, Kenya, Feb 3 - Kenya has renewed its call for faster deployment of solar energy and battery storage as Intersolar Africa 2026 officially opened at the Sarit Expo Centre in Nairobi, bringing ...

KenGen, Kenya's leading electricity generation company, has launched a tender for a solar-plus-storage project named the Seven Forks solar power project, located approximately 150 km northeast of ...

The Garissa Solar Plant is the largest grid connected solar power plant in East & Central Africa. This is the first time that Kenya has developed a major solar power plant to harness its abundant solar energy resource to ...

Kenya will soon have a 42.5MW floating solar plant in the Seven Forks area. This project, set among a cascade of hydropower plants, aims to enhance the country's renewable energy capacity.

The project is expected to last for twenty-eight (28) months and seeks to install a 42.5MW solar power plant in the home of the Seven Forks dams where KenGen generates most of its hydroelectricity.

Key Figures & Findings: Empower New Energy has signed a \$2.5 million deal with Abyssinia Group of Industries to install an additional 4 MWp of solar capacity at its steel plant in Awasi, western Kenya.

Kenya's clean energy sector has received a major boost after the signing of a new \$2.5 million (Sh323 million) solar power deal.

Kenya Government Actively Promotes Kenya solar energy Expansion Nationwide Kenya is strategically positioning itself as a leader in renewable energy, harnessing its abundant solar resources to ...

The Kenya Off-Grid Solar Access Project (KOSAP) is a project of the Ministry of Energy and Petroleum (MoEP) and is financed by the World Bank (WB). It aims at providing electricity and clean cooking solutions in the ...

In essence, the 195 MW Kaptagat solar facility represents a strategic step by the private sector to leverage Kenya's vast renewable potential, turning sunshine directly into vital food-production resources ...
