

From the successful transplantation of Posidonia seagrass to the installation of 5,000 square metres of photovoltaic panels, the district exemplifies Monaco's capacity for innovation in ...

Issue: Revenue-sharing and co-development disputes over joint renewable energy microgrid projects.
Arbitration relevance: Clarified co-ownership, licensing, and royalty obligations.

We modeled this microgrid by leveraging the ETAP software and performed power system studies for both grid-connected and islanded modes of operation. Microgrids employing distributed energy ...

The development of solar energy in the Principality is part of a strong approach by the Prince's Government, whose aim is to reduce greenhouse gas emissions by increasing the share of ...

Monaco has partnered with France to build a massive solar park, marking a major leap towards its goal of sustainable energy. The photovoltaic park, located in France, will utilize the sun's power to ...

Do you feel it in your own company, Monaco Green Energy, which develops photovoltaic power plants? Monaco Green Energy supports governments in energy transition. We are working ...

The Grimaldi Forum and the Monaco Electricity and Gas Company (SMEG) have worked in partnership for a number of years in favour of energy transition. This partnership continues this ...

American Microgrid Solutions is a leading developer of Resilience Hubs - community-serving facilities augmented to support residents and coordinate resource distribution and services before, during, or ...

This course equips electrical engineers and energy professionals with the specialized knowledge and skills to develop, operate, and manage microgrids and distributed generation systems.

Monaco and France are building a large solar park to generate clean electricity for the principality. Learn how this project cuts emissions and champions sustainability.
