Perfect for beginners and tech enthusiasts, this step-by-step guide will walk you through the process of repurposing a mobile battery to build a portable charger.

I have a few power banks that have kicked the bucket and instead of adding them to the great "e-waste spirit in the sky", I decided to pull them apart and re-build them.

I tossed them on my charger and put it in discharge mode, and charged the other. It has a 5000 mAh limit for capacity and a 300 minute safety timer, and it maxed out, so I can safely assume that it's well ...
