

# National Poverty Alleviation Project Solar Power Generation

By employing a difference-in-differences strategy, we find that the community-based PVPA stations distributed in China are anti-poverty facilities that can reconcile equity and efficiency.

Since 2013, China has implemented a large-scale initiative to systematically deploy solar photovoltaic (PV) projects to alleviate poverty in rural areas.

To address this problem, we take China's Photovoltaic Poverty Alleviation Project (PPAP) as an example to empirically study the benefits of large-scale PV deployment for alleviating poverty ...

The photovoltaic poverty alleviation project, part of the "Ten Major Precise Poverty Alleviation Projects" implemented by the Poverty Alleviation Office of the State Council, significantly ...

To synergize climate mitigation with poverty alleviation, China has implemented photovoltaic poverty alleviation (PVPA) projects since 2014, with Anhui Province being among the ...

Since 2014, the Chinese government has begun to implement the PV power generation for poverty alleviation, which not only was in line with the concept of green development but also ...

Here, we present a comprehensive assessment of the emission-reducing and income-increasing effects of the PVPA policy using estimated carbon emission factors and a staggered ...

Solar PV poverty alleviation projects play a minor role in poverty alleviation. China's solar PV poverty alleviation projects have unreasonable distributions. We shed a new light on evaluating ...

To address this gap, this paper aims to reveal the status, collaborative networks, research hotspots, trends and challenges by conducting a scientometric analysis based on 468 academic ...
