New energy battery cabinet cooling device

Kooltronic offers innovative cooling solutions for battery cabinets and electrical enclosures used in renewable energy storage systems. Click to learn more.

Nenghui liquid-cooled battery cabinet adopts an advanced cabinet-level liquid cooling and temperature balancing strategy. The cell temperature difference is less than 3°C, which further improves the ...

Equipped with an independent liquid cooling system, it achieves higher energy density and enhanced heat dissipation within a compact footprint, while offering advantages such as high efficiency, low ...

The system integrates batteries, power conversion systems (PCS), liquid cooling systems, BMS management, and EMS energy management systems into one unit, featuring high energy ...

With the support of long-life cell technology and liquid-cooling cell-to-pack (CTP) technology, CATL rolled out LFP-based EnerOne in 2020, which features long service life, high integration, and a high ...

Bluesun liquid-cooling battery cabinet integrates battery packs, PCS inverter, cooling and fire suppression into one compact system, ensuring safe, efficient, and fast installation.

Designed for high-density energy storage, this cooling unit combines 20 years of expertise for safe, reliable, and efficient cooling. It uses a fan to release heat and a compressor system with glycol for ...

AceOn"s eFlex 836kWh Liquid-Cooling ESS offers a breakthrough in cost efficiency. Thanks to its high energy density design, eFlex maximizes the energy stored per unit of space, drastically reducing ...

The Wattainer Liquid-Cooled Series features high-performance, liquid-cooled batteries housed in modular cabinets. This advanced liquid-cooling thermal management system results in better battery ...

It integrates EMS, advanced liquid cooling technology, and high-quality LiFePO4 batteries to ensure safety, efficiency, and longevity. Ideal for peak shaving, valley filling, and microgrid systems, this ...
