

# Off-grid supplier of photovoltaic containers for airports

Our Solarfold(TM) containers can be fully deployed and operational in under 6 hours. The automated unfolding system allows for quick setup without needing extensive technical expertise or heavy ...

Ideal for temporary power, remote locations, or emergency backup, these all-in-one solutions combine high-efficiency solar generation with integrated storage for rapid deployment in construction, events, ...

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery bank, ...

Whether you're looking for large-scale utility solar projects, commercial containerized systems, or mobile solar power solutions, we have a solution for every need. Explore and discover what we have to offer!

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

Our containerized off-grid solar solutions provide customers with a flexible and reliable way to access clean and renewable energy in remote locations or areas without reliable access to the grid.

We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

The off-grid version consists of a Solarfold container which, in conjunction with a suitable additional storage container, is not connected to the public power grid and functions completely autonomously.
