

# Photovoltaic IP55 Outdoor Cabinet Power Distribution Comparison Test

What is the difference between IP55 & IP65 rated cabinets?

IP55: Electrical panels in non-sterile hospital zones where periodic sanitization occurs. IP65+: Laboratories, operating rooms with frequent disinfection procedures. Our stainless-steel IP-rated cabinets comply with hygiene-critical applications, ensuring cleanability and resistance to medical-grade cleaners.

What is an IP55 outdoor cabinet?

The second "5" indicates that the body can withstand the effects of water jets coming from any direction. This means that an IP55 outdoor cabinet can operate safely during rain, splashes, or routine external washing, making it suitable for most outdoor telecom and electrical installations.

Why should you choose an outdoor electrical enclosure with an IP55 rating?

When you choose an outdoor electrical enclosure with an IP55 rating, you get a solid balance between protection against dust and water. The IP55 rating means your equipment receives almost complete protection from dirt, dust, oil, and other non-corrosive materials. You also gain complete protection from contact with the enclosed equipment.

What is an IP55 rating?

One of the most widely used protection levels is IP55. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments.
