

How do solar panels attach to a standing seam roof?

The clamps fasten to the upstand allowing for a rail to fix to them using bolts. The solar panels then fix to the rail. One last thing to consider when installing solar panels to a standing seam roof is how to get the cable inside.

How do standing seam solar panels work?

Once the manufacture of the standing seam roof is known, a specialist clamp is selected. The clamps fix to the standing seam, the amount needed is dependent on wind loading calculations, typically four - six per panel. The clamps fasten to the upstand allowing for a rail to fix to them using bolts. The solar panels then fix to the rail.

How to install a solar photovoltaic system on a sheet metal roof?

There are hundreds of different types of mounting systems for sheet metal roofs to suit all scenarios and types of roof. The most efficient way to install a solar photovoltaic system is by using a Heliomotion. Simply because a Heliomotion has innovative sun-tracking technology that enables solar panels to track the sun throughout the day and year.

How to fix solar panels at an angle?

At INDEX you can find a wide range of fixings and accessories designed specifically for this purpose: Adjustable triangles. They are ideal for fixing solar panels at an angle and are mainly made of steel and aluminium. They are used as a complement to the support and help to regulate the inclination of the panels on the roof.
