HELSINKI - Two lives lost, over 200,000 homes plunged into darkness. The recent Scandinavian storm, while now receding, isn't just a weather event; it's a flashing red warning light ...

The power cuts will be rotated as approximately two-hour outages until the electricity shortage is over. Blackouts in Helsinki within the area of Helen Electricity Network will last about one hour. Outages ...

In the Helsinki metropolitan area, the water supply will keep operating during short power outages. The water pressure may be lower in high-altitude locations and in properties with their own pressure ...

Most of the disturbances are temporary interruptions caused by thunderstorms or other climatic reasons, and go away automatically with reconnection. Disturbances are usually short in time and therefore ...

On this page you will find information about power outages in Helsinki. The electricity network is operating normally. In fault situations, we notify of power cuts as soon as possible. Is there a power ...

Report faults and disruptions: You can report such things as power and water outages, disruptions in gas and heat supply, and faults in outdoor lighting, parks and road signs.

Our outage map shows the real-time outages on our network area and gives estimates of the length of the power cut.

Winter storm Hannes brought power cuts, traffic disruption and dangerous weather conditions across Finland on Saturday, with wind gusts exceeding 30 metres per second in coastal ...

Hannes storm leaves more than 100,000 households without power across Finland, disrupts rail and air traffic, and keeps emergency services busy as repairs extend into next week.
