

The company designs and produces modular battery storage systems that optimize self-consumption, allowing households and businesses to effectively use solar energy while reducing electricity costs.

The intelligent RCT Power Storage Systems ensure that your surplus solar power is stored efficiently and used when the sky is cloudy or at night. You use solar energy sustainably and become more ...

During the day, when the sun shines, your photovoltaic system usually produces more energy than your household consumes. With a RCT Power Storage System you store your solar power locally and use ...

The RCT Power Storage AC uses high voltages keeping the charging and discharging currents low. This approach minimises the temperature cycles in the battery resulting in significantly extended battery ...

200kW High Temperature 3-Ph Motor Drive.

The RCT Power Battery stores your solar energy for use when the sun is not shining, using especially safe and environmentally friendly LiFePO4 battery cells. The modular system can be upgraded and ...

Drawing on Germany's renowned technology and quality standards, RCT Power provides comprehensive green energy solutions worldwide for Residential (RESS), Commercial & Industrial ...

The intelligent RCT Power electricity storage units optimise self-consumption and ensure that as much solar electricity as possible remains in your household. With increasing self-sufficiency, your ...

RCT Power storage systems offer a particularly efficient storage solution for residential photovoltaic systems. The modular design is suitable for use with new as well as retrofitting of existing PV ...
