

Rent a house with photovoltaic panels on the roof

What if I can't install solar panels on my rental property?

Community solar is another excellent option for renters who cannot install solar panels on their rental properties. Community solar projects, also known as solar gardens or solar farms, are large off-site solar installations shared by multiple subscribers.

Are solar panels a good option for renters?

The simple answer for renters who want solar panels for their apartment or house is that it's possible!

How do I choose a solar panel system for my rental property?

Roof Space: The available roof space on your rental property will determine how many solar panels you can fit onto it, which affects the overall capacity of your solar panel system. **Budget:** Your budget plays a significant role in deciding how big or small you want to go with a solar panel system installation.

Can a landlord install a solar panel system?

While you may be able to pitch your landlord to install a rooftop solar panel system, community solar is more likely to be your best bet to enjoy the benefits of solar if you don't own your roof space through incentives like virtual net metering. Community solar participants can earn credits back on their electricity bill, saving money every month.
