

UGT Renewables is working with Serbia's EPS to provide a series of self-balanced utility-scale solar projects, including battery storage, to every corner of Serbia.

In November 2023, the Government of Serbia selected the Hyundai Engineering-UGT Renewables consortium as the top bidder in a public call for a strategic partner for building the solar ...

Serbia, in particular, is setting ambitious targets. Currently, Serbia generates around 38% of its energy from renewable sources, with plans to increase this share to 45% by 2030.

Located about 80 kilometers from Belgrade, the capital of Serbia, this photovoltaic power plant is currently the country's largest of its kind under construction and the country's first large-scale ground photovoltaic power ...

Serbia is poised to make a significant leap in its renewable energy journey with the announcement of its largest-ever solar power plant. The ambitious 170 MW project, set to be developed in Tresibaba, marks ...

The first ground-based photovoltaic project constructed by a Chinese company in Serbia, called the Saraorci photovoltaic project, is expected to be connected to the grid and commence commercial ...

The Serbian Government has approved the development of a spatial plan for constructing large-capacity self-balancing solar power plants paired with battery energy storage systems.

Three electrical substations with 28 inverters were installed and 2.5 km of AC cables were used to connect them. The expected annual production of the solar power plant has been declared to be 15.1 GWh, ...

Serbia has taken a bold step toward renewable energy with a newly signed agreement to build 1 GW of self-balancing solar power plants. This groundbreaking project, led by the Hyundai ...

The preparation of documentation is going as planned and the first works on the project in Serbia for solar power plants of 1 GW in total and batteries is expected by early 2026, Minister of ...
