

How much power does a silent electric generator have?

Our Silent Electric Generator has 12kW Hours of backup power. You can add an additional 12kWh which doubles the capacity to 24kWh. The unit can be recharged using Solar Panels (Supplied), Windmill or Electricity. Runs any 120v or 240v appliances. Can be connected to your existing power at your home in the event you lose power.

What is a portable solar generator?

The solar panels used in conjunction with a portable solar generator are mobile and easy to manipulate. Unlike the panels found on residential or commercial properties, they are smaller in size and have a lower wattage capacity, which means less solar input than their larger counterparts.

Are solar generators safe?

Solar generators are also quieter, safer, and require minimal maintenance since they don't have motors, moving parts, or emit harmful carbon dioxide. This alternative kind of generator is a green solution that collects energy from the sun to store in its battery and then produces power when it's in operation.
