

The experiment officially launched in 2025 under the title Project Nexus, and it involves a 115-foot-wide canal covered in solar panels, with the intention of having the canal and solar...

Explore the latest solar panel technology, new solar panel technology, and solar energy technology trends improving efficiency.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Solar energy projects are front and center tackling the energy and emissions issue. From California to New England, construction of solar energy is picking up speed, showing promise for ...

In this week's list, we take a deep dive into the uses and application of solar power, including agriculture, aviation and retail.

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

Miles-long rows of solar panels humming under the desert sun, powering whole regions. This list cuts through the noise, ambitious announcements, and glaring projections.

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

These projects, from solar-powered airports to pioneering solar flights, not only highlight the technological advancements in renewable energy but also underscore a collective commitment to ...

From bifacial modules to perovskite cells, solar technology is advancing rapidly. Learn which innovations offer the best ROI now and which emerging technologies to prepare for in your ...
