

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant ...

The installation and grid connection of a photovoltaic (PV) power station involves several stages, from site selection and design to commissioning and integration with the electrical grid.

All solar farms connect to a specific point on the electrical grid, the vast network of wires that connects every power generation plant to every home and business that consumes power.
