

What is a DIY solar Mount?

A DIY solar mount lets you orient your panels for maximized sun exposure. There are various styles of mounts to suit different needs. Roof mounts attach panels to your roof structure, while solar panel ground mounts sit on the land, independent of any building.

How to make a non rotating solar panel stand?

You'll need a handful of items to build a non-rotating solar panel stand. Gather two kinds of lumber: 2x4s for the base and 1x3s for the panel-mounting frame. You'll also require wood screws, a couple of angled brackets for extra support, and a saw. Wondering how to make a rotating solar panel stand?

What is a solar panel mount?

A solar panel mount (or racking system) is the framework that holds your solar panels in place at the proper angle and orientation. In simple terms, it's the foundation that secures solar panels either on your roof or on the ground. Mounts are usually made of sturdy materials like aluminum or steel, designed to last for decades outdoors.
