

Do solar panels save money?

Instead of paying your utility company for power, your solar panels generate free electricity from the sun. Many homeowners cut their bills by 50% or more--some even eliminate them entirely with the right setup. The solar payback period--how long it takes for savings to cover your upfront investment--typically falls between 6 to 8 years. After that?

How much money can you save with solar?

The average U.S. homeowner saves about \$57,000 over 25 years by going solar. Why trust EnergySage? How much can you save on electric bills with solar by state? Are solar panels worth it? What if you could lock in your electricity costs today and never worry about rate hikes again? That's essentially what solar panels do.

Can a solar loan save you money?

Solar loans can provide immediate energy cost savings by replacing your electricity bill payments with lower solar loan payments. However, in the long run, the interest reduces how much you can save with solar panels.
