Valuation, Hadoop, Excel, Mobile Apps, Web Development & many more. The utilization of solar energy traces back to ancient civilizations.

What is solar energy?

Solar energy refers to the energy that is in sunlight. It can be used to generate electricity using solar panels and solar batteries. Solar energy is a widely used energy source around the world. (Note: The passage originally stated 'Solar energy is the energy that is in sunlight. In its substitution,to save natural resources and without a long scientific innovation,it has been found that Solar energy can be used to generate electricity using the solar panel and solar battery.' However,the passage was modified to improve its flow with the question and make it more direct.)
