

Spain invests EUR148.5M in solar-plus-storage projects, making battery systems mandatory for renewables and setting a new EU energy standard.

Accelerated growth of energy storage facilities in Spain, including large hybrid projects with renewables. National and European industrial innovations support advanced solutions adapted to European ...

Spain's solar boom faces a test: Can storage and distributed solar catch up in 2026? After adding more than 7.8 GW of solar capacity in 2025, Spain's photovoltaic ecosystem faces ...

Spain authorizes more than 3,400 MW in energy storage, marking a rebound after the blackout and consolidating solar and battery hybridization. Energy storage has experienced an ...

Spain has established itself as a solar powerhouse in Europe, but a quiet bottleneck threatens the momentum: energy storage. In 2024 alone, the country experienced more than 1,100 ...

Spain's rapid expansion of energy storage capacity is a critical step in the country's energy transition. By adding 3,400 MW in new projects, Spain is positioning itself as a leader in ...

Spain has moved forward with 485.9 MW of energy storage capacity in just one month, with projects entering different stages of the administrative and environmental permitting process, ...

The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms. Spain's electricity grid already generates more than half of its power ...

Spain's Instituto para la Diversificaci&#243;n y Ahorro de la Energ&#237;a (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

Spain's ministry for the ecological transition said on Monday it has provisionally awarded EUR 839.7 million (USD 977.4m) in funds to 143 energy storage projects that will add about 2.4 GW ...
