

Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the entire ...

How solar container systems provide flexible, clean energy solutions for remote, off-grid, and emergency relief efforts. Learn about their advantages, including portability, low carbon footprint, and modular ...

In Kappel, in the canton of Solothurn, one of the largest battery storage systems in Switzerland is currently under construction, with a total capacity of 65 megawatt-hours. The successful delivery of ...

It's a battery. Pump the water up when you have wind/solar energy, let it flow back through a dam/turbines when you don't have solar/wind. Problem with this storage scheme is that it requires ...

A new pumped-storage station in one of the highest and remotest parts of Switzerland will help cope with fluctuations in wind and solar-power supply.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

The Intech Energy Container -- or ECON -- is a modular, pre-configured off-grid power solution. It combines solar PV, battery storage, inverters, and energy management in a rugged container.

Dozens of new technologies, including different battery designs, are at various points on the road from lab bench to commercialization. Pumped storage, however, has already arrived; it ...

One option is stationary battery storage systems. According to forecasts in the Swiss government's Energy Perspectives 2050+ (in German) around 70 per cent of photovoltaic systems will be ...

After countless hours of developing, testing, re-testing and continuously improving, we were pleased to officially launch the ennos ag 1.5 HP sunlight pump at the Alliance for Rural ...
