

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

To be located on a 20,000 sqm (215,280 sq ft) site in Laufenburg in the canton of Aargau, Erne said the 500MW project will be the world's largest battery storage system. The ...

With this large-scale storage system, we are making an important contribution to implementing Switzerland's Energy Strategy 2050. The country is pursuing the goal of transitioning its energy ...

Swiss energy trading group Axpo and local integrated energy solutions provider energieUri AG held a ground-breaking ceremony for two battery energy storage system (BESS) ...

Flexbase Group has broken ground on an 800 MW/1.6 GWh redox flow battery project in Laufenburg, Switzerland, in what could become one of Europe's largest flow storage systems.

Swiss engineers are converting excess summer solar into hydrogen stored in repurposed natural gas caverns. Come winter, this becomes heating fuel - solving the seasonal mismatch that ...

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the increase in electric cars.

A Swiss consortium has commissioned a ground-mounted, vertical PV-plus-storage plant on an area of around 6,000 m<sup>2</sup> in the municipality of Kaltbrunn, in the canton of St. Gallen, Switzerland.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.
