

Is putting solar panels on roofs a solution in Syria?

"The solution to the problem isn't putting solar panels on roofs," Syria's interim Energy Minister Mohammad al-Bashir told The Associated Press. "It's securing enough power for the families through our networks in Syria. This is what we're trying to do." Some of the efforts focus on simply repairing infrastructure destroyed in the war.

What is Syria's Energy Plan?

The plan will look at Syria's projected energy demand and determine how much of it can come from renewable sources.

What role does energy play in Syria's Recovery?

"Given the critical role of energy in Syria's recovery, we have to rapidly address energy poverty and progressively accelerate the access to renewable energy," Sudipto Mukerjee, UNDP's resident representative in Syria, said in a statement announcing the plan.

What was Syria's biggest city like in 2019?

Syria's largest city was mostly pitch-black, the few speckles of light coming from the other households able to afford solar panels, batteries, or private generators. Al-Jenan went thousands of dollars in debt to buy his solar panel in 2019.

General Corporation for Electricity Transmission and Distribution and Syrian-Turkish Energy Company (STE) are building a 100MW solar plant.

Blessed with one of the world's highest solar radiation rates, averaging about 5.5 kilowatt-hours per square meter daily, Syria holds immense potential to become a regional leader in renewable energy. Yet ...

The Syrian Ministry of Electricity is currently managing the construction of a 100kW solar power plant in the town of Sargaya, which is scheduled to be completed by the end of 2023. The project is ...
