

Why must the off-grid solar system be "reliable"? Today, when energy prices are rising and extreme weather is frequent, more and more families are beginning to pursue energy ...

Among the innovative solutions paving the way forward, solar energy containers stand out as a beacon of off-grid power excellence. In this comprehensive guide, we delve into the ...

A complete solar-battery-generator power plant pre-built into a shipping container. We integrate the inverter/chargers, lithium batteries, DC charge controllers, switchgear, ventilation/air-conditioning, ...

The solar array is mounted directly onto the container, and can provide both off-grid and grid-tied functionality, with all necessary equipment to ensure safe and efficient operation installed within.

We offer maintenance packages and remote monitoring to keep your solar container operating at peak performance. Our team is available for troubleshooting, system upgrades, and battery replacements ...

Designed for long-term performance in harsh Australian conditions, this system is a practical choice for operations where ease of deployment matters.

Yes, it is possible to upgrade an existing grid-tied solar system to an off-grid solution, but it can be a complex process depending on the specifics of your current setup and your desired off-grid ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

Full-time off-grid home with solar split across house and shed roofs. Lithium battery bank sized for multiple days of poor weather, with an auto-start generator as rarely used backup.
