

Why is Victoria investing in microgrid demonstration projects?

Minister for Energy, Environment and Climate Change Lily D'Ambrosio said: "The Victorian Government is investing in microgrid demonstration projects to improve the agility, resilience, and reliability of Victoria's electricity system.

What are the benefits of a microgrid?

The benefits include energy security, reliability, equity, autonomy and emissions reduction. Above all, microgrids offer a viable alternative to the national electricity grid. They enable communities to take control of their own energy destiny through local generation and ownership.

How can microgrid solutions address regional Victoria's energy needs?

using microgrid solutions<sup>1</sup> to address the energy needs for regional Victoria. Current microgrid solutions include a variety of configurations, and individual geographic locations within Victoria have unique technical and operational requirements.

What is a Victorian microgrid?

The Victorian Government is supporting and developing microgrids. A microgrid can be thought of as a small 'subset' of the electricity grid that provides energy generation and storage to properties at a local level. They can incorporate renewable energy generation from solar panels or wind turbines as well as battery energy storage.

The Donald and Tarnagulla Microgrid Feasibility Study (the study) will inform the practicalities of using microgrid solutions<sup>1</sup> to address the energy needs for regional Victoria. Current ...
