

This new plant is designed to be cheaper and more efficient than traditional solar thermal power stations, making it a major step forward for renewable energy. The power station is located in ...

Developed by the Three Gorges Corporation, a wind and solar energy company headquartered in Guazhou County, China, the new facility combines efficiency, innovation and large ...

China launched a dual-tower solar plant in the Gobi Desert, boosting efficiency and cost savings. This overhead aerial view captures the vast array of heliostat mirrors surrounding the ...

China has achieved a groundbreaking advancement in renewable energy technology with the recent inauguration of the world's first solar-thermal power plant, which employs a dual-tower ...

China just made history by revealing the largest solar farm in the world, located in the western deserts of Gobi. The South China Morning Post and Asia Financial estimate that this ...

This pioneering 50-megawatt solar thermal plant, operational since 2022, uses innovative molten salt technology to store heat energy for continuous power generation. Unlike conventional ...

The solar farm includes the country's first large-scale outdoor solar testing base in the Gobi Desert climate, demonstrating the potential for large solar installations in challenging...

China has switched on a world-first solar thermal power station in the Gobi Desert that is said to be a cheaper and more efficient use of the technology with potential to be scaled up.

In a first, China has switched on a solar thermal power station in the Gobi Desert, a project described as a more cost-effective and efficient use of the technology, with the potential to be scaled ...
